

RAUVISIO MINERAL

PURE CREATION WITH THE SOLID-SURFACE MATERIAL PRODUCT RANGE

THE RAUVISIO DESIGN WORLD

INNOVATIVE SURFACE SOLUTIONS BY REHAU

With comprehensive and forward-thinking complete solutions REHAU has long been setting new trends in furniture design at an increasing rate. REHAU is also meeting this claim in the segment of high-quality surface materials:

Innovative Surface Solutions by REHAU

RAUVISIO is an innovative surface range that combines functionality with extreme durability and an endless variety of design possibilities. Here you will find the right solution for every ambience. Whether it's a naturally individual and timeless elegance in stone, an aesthetic appeal with light-flooded colour tones or impressive compositions in a concrete look, flat or as a highlight – you can create space for new meeting environments.

RAUVISIO mineral – the solid-surface material product range

Pure creation with RAUVISIO mineral: The through-coloured solid-surface material is made from one third acrylic resin and two thirds aluminium trihydroxide with colour pigments. The modern acrylic material is ideally suited for demanding design solutions, e.g. in the kitchen, bathroom and in upmarket interior design. The product range comprises a complete system-, consisting of sheets, processing accessories and mouldings.

RAUVISIO quartz – the engineered stone material product range

Pure atmosphere with RAUVISIO quartz: The engineered stone material by REHAU is even in appearance and has a similar feel to natural stone. The very fine pigmented material represents its outstanding, charming elegance. RAUVISIO quartz is used e.g. for high-quality kitchens and bathrooms, wall cladding, window-panels, tables and other interior design. RAUVISIO quartz is available in 23 designs with a polished or satin-finish surface and in thicknesses of 12, 20 and 30 mm as ready-processed, customer-specific solutions.

RAUVISIO glass – the glass-ceramic product range

Pure aesthetics with RAUVISIO glass: The bright material-coloured base designs Vetro Bianco and Vetro Verde create a certain brilliance and therefore provide creative and translucent glass effects. The unique properties of this material open up fantastic design possibilities, particularly in combination with light. The visual and technical spectrum of applications range from back-lit work and counter tops to kitchen and laboratory tops, as well as back-lit splashbacks and wall cladding. RAUVISIO glass is available in a polished or antique finish in a thickness of 20 mm as ready-processed, customer-specific solutions.

RAUVISIO MINERAL

FOR YOUR DESIGN VERSIONS

Making ideas reality requires innovative materials that do not limit creativity, but inspire it. Let your imagination run wild – with the modern solid-surface material RAUVISIO mineral range. It is ideal for demanding and dimensionally accurate design solutions in the kitchen, bathroom and shop fitting as well as in upmarket interior design.

Service

If you opt for RAUVISIO mineral, you will receive a complete system which in addition to sheets also includes worktops, basins and sinks as well as processing accessories.

See the unique advantages and services for yourself:

- As part of the REHAU EXPRESS COLLECTION, RAUVISIO mineral is available as an attractive standard stock range for interior design.
- Benefit from our expert technical consultancy service, which will support you with all aspects of RAUVISIO mineral.
- RAUVISIO mineral sheets are available in thicknesses of 3 and 10 mm

QUALITY AND PROCESSING

NEW STANDARDS ARE BEING SET

With RAUVISIO mineral ideas become reality – precisely according to the specifications of the designer, or the individual requirements of the customer. This is not only made possible by the large selection of decors, but also an extensive selection of sheets, basins and sinks in various dimensions. RAUVISIO mineral can of course also be combined with different materials like wood, stone or glass - for an interior design that sets new standards.

Product advantages

RAUVISIO mineral is a through-coloured solid-surface that is made from one third acrylic resin and two thirds aluminium trihydroxide with colour pigments. The positive properties of the individual components combine to form a versatile material with an appearance similar to stone, a warm, pleasing surface feel and excellent processing characteristics.

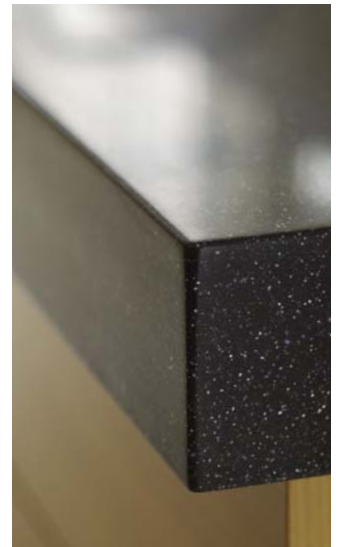

Imagination brought to life: RAUVISIO mineral has a lot to offer and not just with regards to appearance and design. Even in terms of processing many good arguments support the innovative material:

- RAUVISIO mineral sheets can be thermoformed.
- RAUVISIO mineral sheets can be used horizontally and vertically.

With RAUVISIO mineral you can easily create any desired shapes - even if they are really unusual.

See the unique advantages and product properties for yourself:

- Versatile surfaces allow a range of applications.
- Best product quality: As a result of a special process the material is free from tension and has a high continuity of the decorative design.
- RAUVISIO mineral can be processed and fabricated easily and with almost invisible joints.
- RAUVISIO mineral has a smooth, non-porous surface that can be repaired, scratches can be polished out and large areas of damage can be repaired so that they are almost invisible.
- Easy to maintain
- UV-resistant
- Resistant to wear and tear, resistant to household acids and alkaline solutions
- Skin friendly

THE NEW DESIGN RANGE

CURRENT SURFACE TRENDS

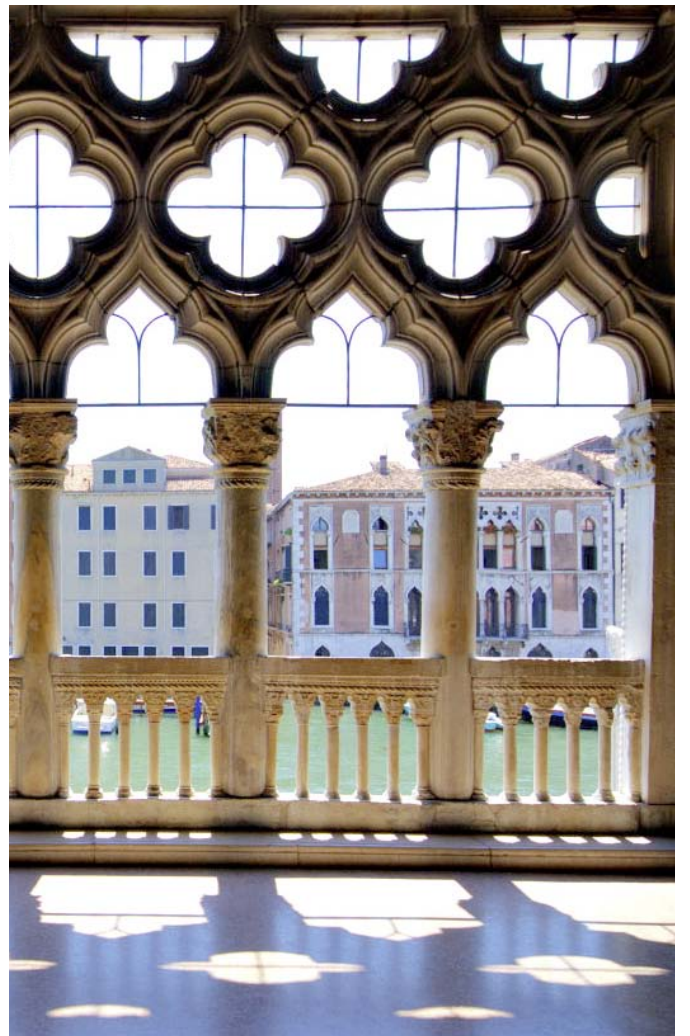

Dr. Leonhard Oberascher is a design consultant, colour designer, psychologist and artist as well as co-founder and associate of the international design group “Grappa Design Approach” and the consortium N&O - Colour & Art. He chairs the AIC (International Colour Association) study group for “Environmental Colour Design” and currently teaches in the Industrial Design department at the Technikum Joanneum (University of Applied Sciences) in Graz, Austria.

He is particularly interested in the psychology of architecture and design and in the question of the function, effect and meaning of colour in architecture, product design, marketing and communication.

Dr. Leonhard Oberascher has also created two new design ranges for REHAU based on current surface trends. The designs will complement the RAUVISIO mineral collection and expand the scope that architects and designers require for demanding design solutions in kitchens, bathrooms and interior design. Information on these are available separately.

„ORO“ DESIGN RANGE

VENETIAN SPLENDOUR

Venice was at its prime during the Renaissance. Under the rule of the Doges „la serenissima“ became the economical and political centre of Europe and a gateway to the East. Durability and splendour were expressed in high-quality materials and artistic architecture which were distinctive with their oriental and byzantine influences. The nobility clothed themselves in gold brocade, tables gleamed in the finest damask. Refined surfaces and dark and deep colours form the picture. Giovanni Bellini emerged as the founder of Renaissance art whose paintings are defined as having a unique, bright, warm colour harmony.

„VISIONE“ DESIGN RANGE

COOLNESS AND TRANSPARENCY

Ultra-modern architecture has many faces.

Architects combine hi-tech with tradition, play with the elements of light, air and water, allowing buildings to hover unbelievably like a mirage. Modern materials with homogenous surfaces, clear designs, openness and width make architecture an experience for all senses. Light-flooded, atmospheric colours which are reminiscent of the sky, sea and skyline bring architecture and nature together in a charming combination. Whoever enters into this architecture finds themselves in spaces full of transparency and translucency.

AREAS OF APPLICATION

IDEAS BECOME REALITY

RAUVISIO mineral - Design for furniture

Whether at home or in public areas: RAUVISIO mineral can be seen everywhere. This is not only made possible by the large selection of mouldings and sheets in various thicknesses, but also the extensive decorative design pallet. RAUVISIO mineral can of course also be combined with different materials like wood, stone or glass - for an interior design which sets new standards.

RAUVISIO mineral is versatile

- in kitchens and bathrooms
- in offices and public areas
- in catering services and hotels
- in laboratories
- in health services

CAST BASINS

SQUARE AND ROUND SHAPES

Cast RAUVISIO basins by REHAU are available in white. Due to the unique material properties, e.g. the non-porous surface, the wash basins are particularly hygienic (e.g. for clinical facilities) and can be supplied either with or without overflow on request. Having a 15° angle, the basins are suitable for flush fitting, but equally for undermount installation.

These wash and laboratory basins are suitable for hot water of up to 80 °C. In combination with our numerous decorative design variants various design possibilities are presented. Milling guides are available as an accessory, which makes the installation of the wash basins easier.

More basin shapes are available on request. Drainage systems for our individual basins are not part of the scope of supply (exception: Angolo S03). When using drainage systems the structural implications are to be considered, if necessary the installation should be carried out by an expert installer.

AQUAFONTE

WASH BASINS

Design for wash basins

AQUAFONTE is the wash basin product range from REHAU that can be undermounted which is matched to the colour of our RAUVISIO mineral sheets. Therefore you can design your bathroom area according to your individual requirements. AQUAFONTE in the solid-surface material RAUVISIO mineral is a design-oriented solution for wash basins which makes it possible to create highlights which are rich in contrast or colour harmony with the worktop. AQUAFONTE wash basins are available in a choice of round or oval design in various dimensions. These basins are suitable for

hot water of up to 80 °C. Further dimensions and decorative designs on request.

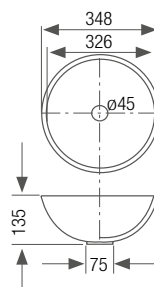

Due to the manufacturing process the decorative design can be a bit lighter towards the basin edge. With increasing colour intensity this effect can become more pronounced.

Drainage systems for our individual basins are not part of the scope of supply. When using drainage systems the structural implications are to be considered, if necessary the installation should be carried out by an expert installer.

AQUAFONTE

WASH BASINS

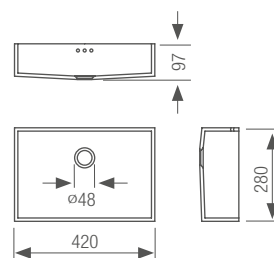

Modern architecture calls for clear, timeless shapes. REHAU is picking up on this trend with square, puristic-looking wash basins in the AQUAFONTE range. A product range which lives on aesthetics and

a reduction to the basics. Undermounted and surface mounted basins are available in the colour spectrum of the whole RAUVISIO mineral Collection.

AQUASINO

KITCHEN SINKS

Our range of sinks made from RAUVISIO mineral is called Aquasino. With this REHAU offers a robust, highquality solution for the kitchen.

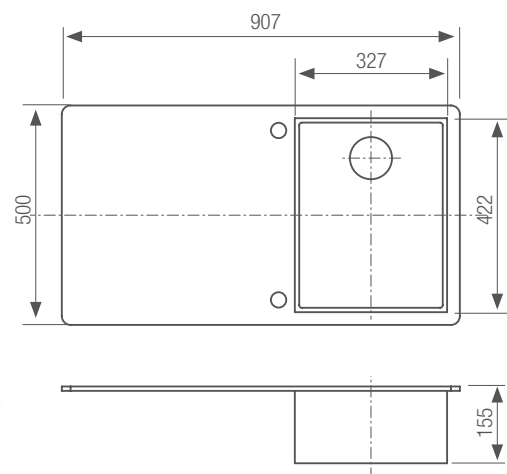

- High quality due to superior processing
- Durability and resistance due to the robust stainless steel base
- The kitchen sink product range can be undermounted
- Due to the almost jointless processing the sink and worktop looks like one piece
- The sinks with stainless steel base are suitable for hot water of 95 °C

Aquasino is available in 10 different designs. Depending on the installation situation you can get corner sinks, single-basin sinks and sinks with 1½ basins. All decorative designs in the RAUVISIO mineral product range are available.

Aquasino combines functionality with aesthetics and refined design for high requirements!

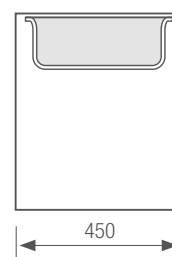

More basin shapes on request.

RAUVISIO WORKTOPS

THE COMPLETE SOLUTION

With pre-fabricated worktops in RAUVISIO mineral we offer you the possibility of a simple and efficient solution for versatile application possibilities.

You have a choice of 40 decorative design variants and there is a suitable solution for every taste.

Article	Article No.
3,680 × 600 × 41 mm	231 300

Properties:

- Base material chipboard (V20) 38 mm thick
- Top side overlaid with 3 mm RAUVISIO mineral
- Under side with phenol balancing foil 0.7 mm
- Front edge with RAUVISIO mineral 3 mm (both sides radius R3)
- Back edge with RAUVISIO mineral 3 mm
- Without side edges
- Surface and front edge without sanded end finish
- A loose RAUVISIO mineral 3 mm (3,680 × 45 × 3) edge strip is included with every worktop

Composition

RAUVISIO PU FOAM SUBSTRATE

DESIGN FOR FURNITURE

INNOVATIVE SYSTEM SOLUTIONS FROM A SINGLE SOURCE

REHAU has established itself as a leading manufacturer and supplier of innovative system solutions for a wide variety of different applications in the furniture industry, for the trade and interior design.

With the EXPRESS COLLECTION REHAU supports its partners from commerce and trade. The attractive standard stock range offers a comprehensive selection of products and services.

Everything from one source

In the REHAU EXPRESS COLLECTION you will find a wide range of

- RAUKANTEX edgeband materials and tools
 - RAUVOLET tambour door systems
 - RAUVISIO surface solutions
 - RAU WALON wall seal systems
- and much more.

Quick, flexible, small quantities

The REHAU EXPRESS COLLECTION scores particularly highly with its short lead times and quantities tailored to requirements. These enable to meet your customer's requirements quickly and flexibly.

Design variety and design expertise

The diverse product range and the multifaceted colour and decor range is constantly being further developed through innovations and is being adapted to current market trends all the time.

With matching designs across different products REHAU underlines its expertise and at the same time its claim with regard to function and design.

In addition, the edgeband product range is coordinated with the current board and laminate designs and included in our extensive collection network.

Advancement through knowledge

We secure your advancement through knowledge with the REHAU ACADEMY. At seminars and other events you can get technical support and advice as well as processing support in every aspect of the REHAU EXPRESS COLLECTION.

In short:

the REHAU EXPRESS COLLECTION offers high performance in every respect. Why not take advantage of it?
